

Peace of Mind

With fast cars, peer pressure, and limited real world driving experience, parents know that cars and teens are a potentially deadly mix. The statistics confirm this:

- Motor vehicle crashes are the leading cause of death for teens in the U.S.
- Teenage drivers have the highest crash risk of any age group
- Excessive speeding is cited as the #1 reason for teen accidents

As a responsible parent, there is finally a solution available to help you monitor and manage your teen's driving behavior.

Quick and Easy

Using a web-based monitoring system and the latest in GPS tracking technology, you will have critical information about your teen driver, when and where you need it.

It starts with a GPS beacon in your vehicle. Today's latest beacons are self contained and connect easily to your vehicle's power system.

You can be up and running within minutes.

A Parent's Best Friend

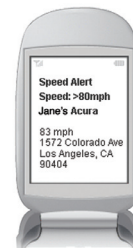

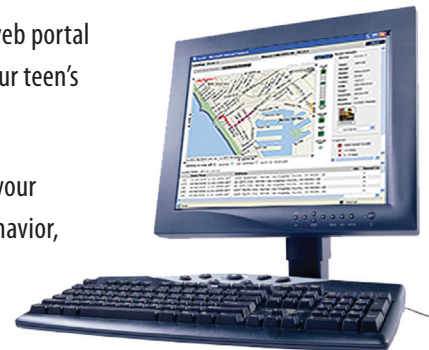

From your home or office, log-in to your secure web portal to locate your vehicle, or review reports about your teen's driving activity.

You can also receive notifications via email or to your cell phone to keep track of your teen's driving behavior, including:

- Speed monitoring
- Zone alerts for allowed and disallowed areas

There is always the option of having 24/7 alarm monitoring of these events.

Above all, the system is cost-effective for any family.

Contigo And You. "The Right Connection."™
