Latest Release from Vecima Networks

The latest release of the Vecima Telematics System will be completed on Thursday, November 26, 2020. Please see below for a brief description of the enhancements included in this release.

Feature	Description
Expanded Historical Data Availability	We have recently expanded our database capabilities to manage up to 5 years of historical data for all customers. As of this release, data will be made available in historical reports going back to January 1, 2018. This will continue to be the earliest historical data available until January 2023, when the 5-year limit is reached. After this date, the 5-year window of available historical data will roll forward on a monthly basis.
System Enhancements	This release includes system and infrastructure enhancements that will improve security and reliability.

In addition to the features above, this release will also include other minor bug fixes and enhancements.

If you have any questions or comments, please do not hesitate to contact us at support.telematics@vecima.com.

Best regards,

The Vecima Team
