

Latest Release from Vecima Networks

The latest release of the Vecima Telematics System will be completed on Thursday, **April 13, 2023**. Please see below for a brief description of the enhancements included in this release.

| Feature | Description |
|-------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Improved Portal Login Security  | <p>To improve the security of the system, a more robust password policy is being introduced for all portal logins.</p> <p>Users will be able to change their own passwords from the dropdown on the main menu bar. New passwords will require a secure combination of letters, numbers, and special characters.</p> <p>Please note that all existing passwords will remain valid following the release date. Only new passwords created after the release will be required to adhere to the new policy.</p> |
| Scheduled Item Status Report  Item Status | <p>The Item Status Report may now be scheduled to run automatically, to provide regular updates to recipients.</p> |
| System Enhancements | <p>This release includes system and infrastructure enhancements that will improve security and reliability.</p> |

In addition to the features above, this release will also include other minor bug fixes and enhancements. If you have any questions or comments, please do not hesitate to contact us at support.telematics@vecima.com.

Best regards,

The Vecima Team
