

Latest Release from Vecima Networks

The latest release of the Vecima Telematics System will be completed on Thursday, **February 13, 2025**. Please see below for a brief description of the enhancements included in this release.

Feature	Description
<p>Beacon Installer Test Tool</p> <p>Companies can now provide installers with access to a separate, independent test tool for beacon installation. The invited installers do not have access to the organization's telematics portal and it is therefore ideal for third party installers.</p>	
<p>Invite Installers to Test Beacons</p> 	<p>In the telematics portal, Administrators will see a new "Installer" menu in the Administration tab. This menu will allow users to:</p> <ul style="list-style-type: none"> • Invite Installers to the independent test tool. Administrators can set an expiry date or allow access to never expire. • Administrators can later revoke or extend access for the installers.
<p>Installertest.com Web App</p> 	<p>Installers will receive an email to setup their login credentials to the beacon test tool website: installertest.com.</p> <p>Installers will have access to a suite of test procedures via their mobile device to verify:</p> <ul style="list-style-type: none"> • Network connectivity • GPS reception • Ignition wiring • ECM data • NET collector functionality (Vehicle and Fixed collectors), if applicable • Optional add-on features such as Inputs and Outputs, Driver ID and Temperature Sensors, if applicable <p>The tool also allows the Installer to upload images, synch odometer, and enter license plate info.
