

Founded in 2002, Contigo is the leading provider of GPS-based, mobile security solutions for the security alarm monitoring industry.

Contigo's patented system enables security companies to expand from monitoring stationary items such as buildings and homes to monitoring mobile items of value - assets, vehicles and people.

Learn why more and more companies choose to partner with Contigo for GPS by calling 1.866.477.1767 or visit our website at www.contigo.com.

The Leading Provider of GPS Solutions
to the Security Industry

Real-Time Peace of Mind

Help your customers keep track of the things important to them with GPS-based mobile monitoring from Contigo™. Whether for their vehicles, assets, personnel or loved ones, today's GPS technology can help provide real-time peace of mind about the location and status of the items they care about most.

Security

If it's valuable, it's at risk of being stolen. Using small, weatherproof GPS beacons with long battery lives, Contigo has a solution for nearly any commercial asset tracking need: indoor, outdoor or in-transit.

Productivity

Fleet or equipment managers can benefit from Contigo's productivity solutions. Keep track of miles traveled, engine hours, start/stops and a host of other relevant operational data.

Family Safety

Families can now extend the security umbrella beyond their home by using GPS to monitor their vehicles, children, pets and elderly parents.

Informative & Easy to Use

From any web-accessible computer, your customers can monitor the status of their mobile items through a secure web portal. They can get real-time location information, run reports on historical activity, and set up alerts that can go to their email, cell phone or even a central monitoring station.

Your Mobile Monitoring Partner

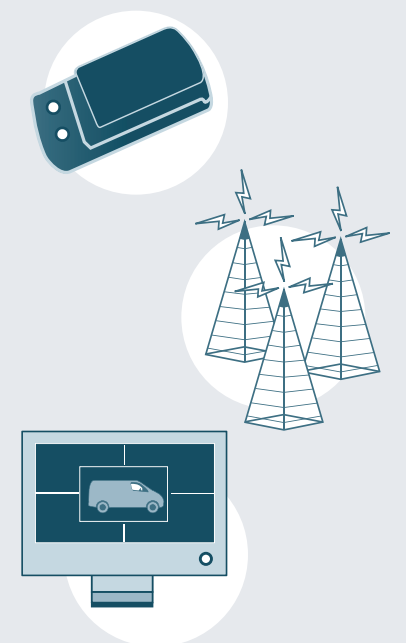

Pursuing new markets such as GPS couldn't be made any easier than with Contigo's turn-key mobile monitoring system. 100% web-based. Private labeled with your logo and colors. Get up and running quickly, start generating RMR today.

Turn-Key = Headache Free

As your mobile monitoring partner, Contigo manages all components of your mobile monitoring system:

- We integrate the best GPS beacons from manufacturers around the globe for commercial and consumer applications.
- We handle the technical and billing relationships with the wireless carriers across North America.
- We develop and host the software applications that are used by your staff and your customer base.

This turn-key approach not only saves you time, money and hassles, it allows you to focus your resources on growing your business.

Contigo's industry leading GPS platform is supported by a Customer Experience team that is the best in the business. Friendly, knowledgeable staff are available to help you get started, resolve an issue, and even assist with sales. Just ask some of our partners:

"Contigo's support team has been very responsive to any and all of my needs giving me the ability to keep my customers satisfied, which of course is great for business."

"Unlike other GPS providers I have worked with in the past, I get quick results to any customer issues and answers that make sense."

"I've dealt with several GPS companies in the past, and in comparison Contigo has been a pleasure to work with by far."
