

Latest Release of the Contigo System

The latest release of the Contigo system was completed Friday, February 20, 2009.

Please see below for a brief description of the enhancements included in this release.

Feature	Description
Idle Time Report with Map	<p>Idle Time report with Map displays driver's location on map. Click on address of idle point to view on map. Easily view all of a driver's stops on a single map. Flexible options to show or hide idle reports for each driver.</p> 
Scheduled Mileage Report	<p>Mileage report may now be automatically run daily or weekly. Output produces per day, per driver mileage totals Data available in convenient CSV, XLS or PDF format.</p>
Idle Alerts	<p>Fleet managers may now actively manage driver idle times to reduce fuel consumption. Set threshold for notification (e.g. +3 mins). Supported within existing scenario builder.</p>
View Lat Long on Event Detail Report	<p>Provides additional detail for fleet companies managing their business using latitude/longitude. Assists in situations where equipment or vehicles operate outside of municipal/existing roads</p>

In addition to the major features above, this release will also include bug fixes and other minor enhancements.
