

## Latest Release of the Contigo System

The latest feature of the Contigo System was released on Friday June 4, 2010.

Please see below for a brief description of the enhancement included in this release.

Feature	Description		
Custom Time Slots for Reporting	Fleet managers need to track and audit the actions and driving behaviour of their fleet drivers during specific times each day. This new feature provides the ability to run any report and retrieve data only for a very specific block of hours each day, or days of the week.		
	You can create and save custom "time slots" that can be used when running any real-time or scheduled report:		
	For example:		
	<ul> <li>Run a mileage report for the last week for all personal hours (midnight to 8am and 5pm to midnight)</li> </ul>		
	<ul> <li>Run a stop report for the last month for working hours (say: 8- 5pm, Wednesday to Sunday)</li> </ul>		
	<ul> <li>Run an idle report for this month for the morning hours 7am to 10am, 7 days of the week</li> </ul>		
	Note: Running reports with Time Slots for more than one month of data may take a long time to finish (many minutes). To make reports run faster, select fewer beacons to display and/or run reports for one month or less. Where possible, use Scheduled reports.		
Create and Save Custom Time Slots in Administration Tab	support     body     budge     budge       home     vehicles     assets     personnel     maintenance     reports     dispatch     administration       Addministration     Add Custom Report Time Slots     Schedules     Felds marked with * are required.
