

Latest Release of the Contigo System

The latest release of the Contigo System was completed on Friday April 29, 2011.

Please see below for a brief description of the enhancement included in this release.

Feature	Description
<p>Garmin Dispatch Enhancement - Driver ID & Status</p>  	<p>Dispatchers now have the ability to send Jobs and Messages to a Driver – regardless of which vehicle they are operating – and receive Driver Status updates.</p> <p>Previously, Dispatchers would send Jobs and Messages to a Vehicle but this could be challenging if Drivers shared vehicles from a pool. Now a Driver may set a Driver ID on their Garmin device and receive Jobs and Messages specific to them, in any vehicle they are using.</p> <p>A Dispatcher can now also know, at a glance, the current status of Drivers, and whether or not they have recently changed. Drivers can update their Status on a Garmin throughout the workday from a configurable Driver Status list. Examples of Driver Status are: On Duty, Off Duty, Inbound to Yard, Lunch, etc.</p> <p>Support Contigo 6150 or 6100 beacons: Garmin nuvi 255/255W, 265/265W or 465T.</p> <p>Coming soon (Q2, 2011): Contigo 6150 support for Garmin nuvi 12XX, 13XX and 14xx models.</p>

In addition to the feature above, this release will also include bug fixes and other minor enhancements.

If you have any questions or comments, please do not hesitate to contact us at support@contigo.com.

Best regards,
The Contigo Team
