

Latest Release of the Contigo System

The latest release of the Contigo System was completed on Thursday April 25, 2013. Please see below for a brief description of the enhancements included in this release.

Important Note

- To ensure that all portal features function correctly, it is recommended that you clear your browser's cookies and cache. For assistance, please visit http://www.contigo.com/clear_browser_cache.html.

Feature	Description
<p>Contigo Mobile Tracker</p> 	<p>Users with access to the GPS Fleet Tracker mobile app on iPhone and Android can now enable a tracking session on their smartphone, turning their phone into beacon in the Web Portal.</p> <ul style="list-style-type: none"> Operators can now manage mobile devices (iPhone and Android) as part of their fleet. One easy screen tap in the mobile app starts a tracking session with 10-minute updates. Drivers with a smartphone can now be tracked independently of the vehicle they are operating. Mobile devices will appear in Map View along with vehicles, as well as in Route Log and Event Details Reports. <p>Note that a Contigo Mobile Tracker license is now required to enable this feature.</p> <p>The app is available from the iTunes App Store and Google Play. Search for:</p> <p>GPS Fleet Tracker</p>  <div>   </div>

Feature	Description
<p>iPhone app restart notification for Mobile Tracker</p> 	<p>In the previous (beta) release of Mobile Tracker, the phone's operating system would occasionally terminate the active tracking session on the iPhone unexpectedly.</p> <p>With the 1.0.3.1 release of the iPhone app, the user now receives a notification if this happens, with an option to easily restart tracking.</p>
<p>Updated Contigo Map Service</p> 	<p>In order to continue updating the maps in the Contigo browser with new features, a change was required in the underlying technology, moving from Flash based maps to JavaScript.</p> <p>Unfortunately, this change introduced performance issues with the declutter feature, as well as script errors that appear in older browsers such as IE8.</p> <p>Users now have the option in their admin profile of selecting the mapping technology that is best suited to the current browser.</p> <p>Selecting Flash will eliminate the issues described above for older browsers, but users are encouraged to update their browser to take advantage of new map-based features.</p> <p>Note that opting for Flash maps requires FlashPlayer 11.1+ to be installed in your browser.</p>

Feature	Description
Beacon Test Tools – Test Complete Notification <div> <div>Beacon Notes:</div> <div> [Add note] 04/23/2013 09:41AM Test Communications and GPS : pass 04/01/2013 12:41PM Registered </div> </div>	<p>When a test is performed on a beacon using the Beacon Test Tools, the timestamp and result of the test is now stored in the Beacon Notes for future reference.</p>
Guardian-mms.com domain to be phased out	<p>In the near future, the guardian-mms.com domain will be removed from service. All web portal/site addresses that previously used this domain have been changed to contigo.com.</p> <p>All partners and their customers are asked to remove bookmarks addressed to guardian-mms.com from their browsers and landing pages, and change these addresses to point to contigo.com instead.</p>

In addition to the features above, this release will also include bug fixes and other minor enhancements.

If you have any questions or comments, please do not hesitate to contact us at support@contigo.com.

Best regards,

The Contigo Team
