

## Latest Release of the Contigo System

An update of the Contigo System will be completed on Wednesday December 17, 2014. Please see below for a brief description of the enhancements included in this update.

### Important Notes

1. With the launch of Google Maps, Flash technology for viewing maps is no longer supported in the Contigo portal.
2. To ensure that all portal features function correctly, it is recommended that you **clear your browser's cookies and cache**. For assistance, please visit [http://www.contigo.com/clear\\_browser\\_cache.html](http://www.contigo.com/clear_browser_cache.html).

Feature	Description
<p><b>Route Log in Map View Beta</b></p> 	<p>In conjunction with our recent release of Google Maps, Contigo is pleased to add this new feature to Map View for beta testing.</p> <p>When you view the Event Popup in Map View, a new icon now appears in the upper right corner of the window.</p> <p>Clicking on this icon will open a new tab in Map View, displaying the Route Log for the vehicle for the current day.</p> <p>Please see the next page for a preview look at the new Route Log in Map View. Feel free to send us your feedback!</p>
<p><b>Declutter Enhancements</b></p> 	<p>The declutter feature has been enhanced on various maps in the portal. The lead lines are now shortened for more clarity, and the Controls menu now allows the user to adjust the font size of the item labels in the view to further reduce clutter on the map.</p>

If you have any questions or comments, please do not hesitate to contact us at [support@contigo.com](mailto:support@contigo.com).

Best regards,  
**The Contigo Team**

The new Route Log in Map View varies somewhat from the existing Route Log Report. Locate events are displayed as a simple dot, whereas other events are highlighted by icons of different color representing the category of event: Red = Alarm events, Orange = Driver Behavior events, Dark Blue = Power related events, and Pale Blue = events pertaining to the Item State.

Up to five Route Log reports may be displayed at one time on different tabs within Map View. Only a single day of data is displayed (the default is the current day). By entering "report setup" a different date may be selected to display for that item.

If the Route Log is being viewed based upon the Driver ID rather than the vehicle, the driver must be active or no data will be returned for the report.
