

Latest Release of the Contigo System

The latest release of the Contigo System will be completed on Thursday October 29, 2015. Please see below for a brief description of the enhancements included in this release.

Please note that all updates will appear automatically in your portal (you are no longer required to clear your browser's cache).

Feature	Description
Congregation Report 	<p>This new report allows fleet managers to determine whether their vehicles are gathering at a particular location for more than a specified amount of time.</p> <p>The Congregation Report will help fleet managers minimize scheduling or dispatch errors, and prevent misuse of company vehicles.</p>
OBD-II Maintenance Codes 	<p>The Contigo 6480 (3G OBD-II) device now has the capability of notifying fleet managers when vehicle maintenance codes are generated by the ECU.</p> <p>These notifications will allow fleet managers to identify when the engine maintenance light appears on the vehicle dashboard, and respond quickly if necessary.</p>
Audio Output Control 	<p>For Contigo 65xx devices equipped with the iButton for Driver ID, when a driver fails to tap their iButton to identify themselves as the current driver, a short audio warning is issued.</p> <p>This warning can now be configured as a continuous sound, which will be emitted until the driver taps their iButton on the reader.</p>

Feature	Description
Microsoft Edge Browser Support 	<p>Many customers are upgrading their portals to the new Windows 10 operating system. With this update, Internet Explorer has been replaced by the new Microsoft Edge browser. The Contigo portal is fully compatible with Microsoft Edge.</p> <p>If you are using Microsoft Edge, you may notice that the print icon is no longer present on certain pages in your portal. If you wish to print any page displayed in the portal, press Ctrl-P to open the browser's print dialogue.</p>

In addition to the features above, this release will also include other minor bug fixes and enhancements.
