

Latest Release of the Contigo System

The latest release of the Contigo System will be completed on Thursday April 21, 2016. Please see below for a brief description of the enhancements included in this release.

Please note that all updates will appear automatically in your portal (you are not required to clear your browser's cache).

Feature	Description
Contigo 2800 Trailer Tracker 	<p>Contigo is pleased to add trailer tracking to our suite of fleet tracking products. The 2800 is designed for reliable, long-term management of trailers which are normally connected to 12V or 24V vehicles, but may remain disconnected for long periods of time.</p> <p>Features include:</p> <ul style="list-style-type: none"> • Up to one month of internal battery life with periodic locates while the trailer is untethered • Fully weather proofed for external mounting • Configurable tracking intervals to maximize battery life • Internal battery recharges automatically when the trailer is tethered to the tractor • Notifications when the trailer is untethered, and when the internal battery charge is low
Device Install Event for 6480 (OBDII)	<p>This event reports the vehicle VIN whenever the Contigo 6480 is plugged in to the OBDII port. This is useful for preventing unauthorized use or tampering with the device.</p>

In addition to the features above, this release will also include other minor bug fixes and enhancements.

If you have any questions or comments, please do not hesitate to contact us at support@contigo.com.

Best regards,
The Contigo Team
