

Latest Release of the Contigo System

The latest release of the Contigo System will be completed on Thursday August 24, 2017. Please see below for a brief description of the enhancements included in this release.

Feature	Description
<p>UI Improvements – Vehicles Tab (Commercial Portal)</p>  	<p>The vehicles tab in the Commercial Portal (CP) has been updated with a new, easy-to-navigate UI that will make fleet management quicker and more efficient.</p> <p>New icons appear to the right of the Vehicle name, and replace several of the links on the old page:</p> <ul style="list-style-type: none">  Open the Beacon Assignment popup to assign a beacon to this vehicle.  Locate the vehicle.  Track the vehicle.  Manage the contacts associated with this vehicle.  [2] View and manage the pictures associated with this vehicle. [x] is the number of pictures currently stored in the system. <p>Clicking on the arrow  to the left of the vehicle name will open sub-tabs containing all the vehicle and beacon information previously found on other pages.</p>

Feature	Description
 <p>The screenshot shows the 'vehicles' tab in the Contigo interface. At the top, there are navigation tabs: home, vehicles, assets, personnel, maintenance, and reports. Below these are buttons for 'Export Filtered (Excel)', 'Add Vehicle', 'Delete Vehicle', and 'Ch'. A table lists vehicles with columns for 'Item Name', 'Actions', and 'Beacon Assigned'. The second row is selected, showing '010657002128150' with various action icons and a beacon ID '010657002128151 (010657002128150)'. Below the table, there are tabs for 'Vehicle Information' and 'Beacon Information'. The 'Beacon Information' tab is active, displaying details for the assigned beacon: ESN: 010657002128151, Name: 010657002128150 [Change Name], Model: 6100, Type: Vehicle, Service Plan: 6100 Service Plan, Assigned To: 010657002128150 [Reassign Beacon], and Color: black.</p>	<p>Now there's no need to navigate away from the vehicle list to view the information you need.</p> <p>Please note that this new layout is still being beta tested, and feedback is welcome. You can still revert back to the previous layout if you need to by clicking on the Classic link in the upper right part of the tab display.</p>
<p>UI Improvements – Beacon Manager Tab (Partner Portal)</p>	<p>Similar UI improvements have been implemented for the Beacon Manager tab in the Partner Portal (PP).</p> <p>We encourage users to try the new Beacon Manager and provide feedback.</p> <p>Like the vehicles tab in the CP, the Beacon Manager is also being beta tested, and you can revert to the old view using the Classic link.</p>

Feature	Description
Fuel Level Measurement	<p>The current Fuel Level (%) for vehicles is now displayed in the detail popup in Map View.</p> <p>Historical reporting of Fuel Usage has been added, and this report also includes the estimated Fuel Economy for vehicles over a specified time period.</p> <p>Note that this feature is only available for beacons that connect directly to the vehicle ECM (models 6480 and 6601).</p>
State Line Crossing Report	<p>This new report provides all locations where vehicles cross state and/or provincial boundaries, and also provides the time spent and mileage within each state or province.</p>
Other System Enhancements	<p>With this launch we are introducing a number of system infrastructure updates that will improve the overall efficiency and reliability of the Contigo customer portal, beacon communications and data access.</p>

In addition to the features above, this release will also include other minor bug fixes and enhancements.

If you have any questions or comments, please do not hesitate to contact us at support@contigo.com.

Best regards,
The Contigo Team
