

Latest Release of the Contigo System

The latest release of the Contigo System will be completed on Thursday December 12, 2019. Please see below for a brief description of the enhancements included in this release.

Feature	Description
GPSFT App – iOS 13 support	The GPSFT app is now fully compatible with Apple devices running iOS 13.
Installer Test Tool Improvements	<p>The installer test tool has been updated to allow for easier management of installer users. Access times for 3rd party installers may now be more easily configured and closely monitored.</p> <p>In-house installers may now be provided with unlimited access to devices.</p>
DEX API Improvements <pre>{ "eventList": [{ "networkTs": 1574103639, "lat": 49.23046, "lon": -122.9857, "event": "ignition_on", "direction": "", "speed": 0, "speedUnits": "kph", "isValid": true, "address": { "street": "5950 Oakdale Road", "city": "Burnaby", "state": "BC", "country": "CANADA", "zipcode": "V5H 4S5" }, "gpsAge": 0 }], "latestTs": 1574103655 }</pre>	<p>A new API endpoint has been added called "events", which provides a list of all events received from a GPS device over a defined time period. Called on a periodic basis, this endpoint can provide a near real time data stream of events generated by a vehicle.</p> <p>In addition to the existing XML output, the API has been updated to provide data output in JSON format, providing more robust options for the receiving system.</p>
Posted Speeds Reporting Improvements	Users can now choose to display only those vehicles that have recorded violations, making the report much easier to read.

Feature	Description
DTC Reporting Improvements	In the Event Details Report, the detailed description for DTCs now appears in the report table (rather than as popup text), allowing the details to be viewed immediately, and exported with the report output.
System Enhancements	This release includes system and infrastructure enhancements that will improve security and reliability.

In addition to the features above, this release will also include other minor bug fixes and enhancements.

If you have any questions or comments, please do not hesitate to contact us at support.telematics@vecima.com.

Best regards,

The Contigo Team
