

Latest Release of the Contigo System

The latest release of the Contigo System will be completed on Thursday March 5, 2020. Please see below for a brief description of the enhancements included in this release.

Feature	Description
6800 4G LTE OBDII Beacon (BETA) 	<p>We have recently added a new 4G LTE beacon to our family of plug-and-play devices.</p> <p>The 6800 supports all of the features of our other OBDII beacons.</p> <p>Please let us know if you are interested in trying out this device as part of the beta test.</p>
Geofence Activity Report 	<p>This new report allows users to select one or more vehicles and show the entry and exit timestamps as well as the time spent within pre-defined geofence zones.</p>
Driver Behavior Report Improvements 	<p>Driver Behavior reports may now be generated automatically and sent to recipients via email on a configurable schedule.</p> <p>In the existing Driver Behavior report only the top 10 offenders are listed. With this release users will have the ability to export the entire list of drivers for their fleet.</p>

Feature	Description
2840 Trailer Tracker Test Tools	The beacon test tool for the 2840 has been expanded. Installers can now test trailer tracker network connectivity, GPS reception and temperature sensor operation within the portal or on a mobile device.
System Enhancements	This release includes system and infrastructure enhancements that will improve security and reliability.

In addition to the features above, this release will also include other minor bug fixes and enhancements.

If you have any questions or comments, please do not hesitate to contact us at support.telematics@vecima.com.

Best regards,

The Contigo Team
